VERITY

Our team of dairy and beef nutritionists, along with our animal nutrition sales specialists work with our producers to design unique nutritional plans that meet the needs of your operation. With more than a dozen professionals across greater Wisconsin, we're ready to visit your farm, develop a plan, and give expert advice on how to reach your goals.

Our nutrition team wants to bring out the best in your animals, whether that means higher production or blue ribbons. Your ALCIVIA team is here to improve your income-over-feed-cost, milk production, cost per pound of gain, herd health, and overall animal nutrition.

We offer a variety of animal nutrition products for dairy, beef, swine, equine, young stock, poultry, and companion animals.

Nutrition Consulting – We pride ourselves on working closely with our member owners to create innovative and flexible solutions that best accomplish their individual goals.

Commodity and Contracting Options – ALCIVIA utilizes in-house staff and facilities to deliver the best pricing to our member owners. With a combination of direct sourcing ingredients, utilizing our internal logistics fleet, and transloading rail ingredients through our Fall River Commodity Facility we are able to capture market opportunities that will benefit your operation.

Products & Services – Our on-staff nutritionists work with your feedstuffs, facilities, and production goals to custom blend rations specific to you and your animals' needs. We provide a full line of supplements, minerals, complete feeds, and forage solutions products including plastics, inoculants, and acids, offering you one-stop shopping for the materials you need to keep your animals and forages at their best.

Local Delivery Service – Our animal nutrition bag route is your friendly, local delivery service for custom feed, bag product, tubs, inoculants, plastics, and more. You can have all of your feed and farm needs delivered right to your location.
