VERITY

Our approach to managing your grain risk and sustaining your profitability starts with understanding your goals. Then we work with you to develop a comprehensive marketing plan that minimizes exposure and fits your financial needs. This plan considers your total acres, cost of production, cash flow needs, storage facilities, and other critical areas.

GRAIN CONTRACT OPTIONS

- **Cash Sale** – Sale of grain at today’s price, nearby delivery, or out of storage at the elevator.
- **Forward Contract** – Delivery for a future date and available for at least two years out. You can place firm offers with us that we can watch for you.
- **Fixed Basis Contract** – This sets the basis price while leaving the futures price open. Sometimes advances are available on a fixed basis contract.
- **Hedge to Arrive (HTA)** – In this futures-only contract, you set the futures price (CBOT price) and leave the basis open.
- **Average Price Contract** – Enroll bushels to receive an average price through a predetermined time frame which represents a historically favorable time to price futures.
- **Direct Ship** – Ask about our opportunities to direct ship to local markets such as ethanol plants, processors, or others.

ACCESS TO MARKET

ALCIVIA utilizes its diverse elevator network and grain marketing expertise to provide efficient grain solutions to our members. We have the storage, receiving, and shipping lanes to facilitate our patrons’ grain marketing needs when it is most profitable for their unique operations. We also have the market access to deliver grain to our destination customers when it is necessary throughout the year. We carefully incorporate all aspects of our cooperative to provide an exceptional member experience.

If you need assistance maximizing your opportunity, please give one of our grain marketing specialists a call – you’ll be glad you did.
