

CALF DEVELOPMENT

ALL. TOGETHER. GROWING.

Sick calves are costly. A quality program will get calves eating faster to decrease mortality and increase weight gain. Pre-conditioning with a quality starter program offers healthier calves, increased feed efficiency, and heavier weights.

BEEF X 15 CREEP B68 PLT

FEATURES // BENEFITS

Protein 15.0%
 Fat 3.0%
 Fiber 23.0%

- Palatable, nutrient dense complete feed
- Pelleted form
- Bovatec®

WHEN TO USE

- Hand-fed
- Low to moderate forage diet

FEEDING RATE

1.5-3% of body weight per head per day

ACCURATION® RANGE 33 R130

FEATURES // BENEFITS

Protein 33.0%
 Fat 5.0%

- Accuration Intake Modifying Technologies to promote snack eating and maintain a more stable rumen pH
- Meal form
- Mixed with ground corn at variable rates to drive or slow intakes
- Can improve feed efficiency up to 33% allowing for similar gains with less feed compared to traditional creep programs
- Rumensin®

WHEN TO USE

- Self-fed

FEEDING RATE

1% of body weight per head per day

PRECON®

FEATURES // BENEFITS

Protein 12.0%
 Fat 1.0%
 Fiber 26.0%

- Highly palatable, nutrient dense complete feed
- Includes RX3™ Immune Support Technology
- Formulated with Availa® 4 trace minerals to support the immune system through periods of stress
- Non-medicated
- Pelleted form

WHEN TO USE

- Hand-fed

FEEDING RATE

1.5-3% of body weight per head per day

STRESS CARE® 5 B100

FEATURES // BENEFITS

Protein 22.0%
 Fat 2.0%
 Fiber 10.0%

- Pelleted starter supplement for calves on good quality pasture, hay, or forage (greater than 8% DM protein)
- Includes RX3 Immune Support Technology
- Formulated with Availa 4 trace minerals to support the immune system through periods of stress
- Bovatec®

WHEN TO USE

- Hand-fed
- High forage diet

FEEDING RATE

5 lbs. per head per day along with forage greater than 8% protein

CALF DEVELOPMENT

ALL. TOGETHER. GROWING.

Sick calves are costly. A quality program will get calves eating faster to decrease mortality and increase weight gain. Pre-conditioning with a quality starter program offers healthier calves, increased feed efficiency, and heavier weights.

STRESS CARE® 10 B45

FEATURES // BENEFITS

Protein 14.0%
 Fat 2.0%
 Fiber 15.0%

- Pelleted semi-complete feed for calves with hay or grass to support intakes and get calves eating quickly
- Includes RX3™ Immune Support Technology
- Formulated with Availa® 4 trace minerals to support the immune system through periods of stress
- Bovatec®

WHEN TO USE

- Hand-fed
- Low forage diet

FEEDING RATE

10 lbs. per head per day

STRESS TUB

FEATURES // BENEFITS

Protein 12.0%
 Fat 4.0%

- Contains proper balance of 14 essential minerals, supplemented by vitamins A, D, and E
- Diamond V XPC® for digestive health and immune function
- Availa 4 minerals formulated at Zinpro® research-recommended rate for copper, cobalt, manganese, and zinc for improved bioavailability.
- Helps calves transition through the weaning phase. Licking creates saliva which helps buffer the rumen.
- Provides access to essential nutrients for timid or green calves

WHEN TO USE

- Weaning and receiving pens
- Stressed cattle
- At calving for the dam

FEEDING RATE

1 tub per 25 - 30 calves
 1/3 - 1/2 lb. per head per day
 Available in 60 and 225 lb. tubs

WEANING PENS SET FOR SUCCESS:

- Feed bunk perpendicular to the fence line to encourage eating
- Provide 1 foot bunk space per calf
- Water perpendicular to the fence line when possible
- Ensure access to clean water
- Place stress tub along the fence line away from water and feed to support timid and green calves
