

PROVANT®

PULSE

PROVANT® PULSE is a foliar applied micronutrient package that can be applied to any food or fiber crop. As a part of a complete agronomic program, PULSE will provide the needed micronutrients to increase yield in a variety of crops.

APPLICATION DIRECTIONS

Apply 1-2 qt/ac. prior to or immediately after deficiency symptoms occur to prevent or alleviate losses from nutrient deficiencies. Spray carrier (water) volumes of 10-20 gal/ac. (ground) or 5 gal/ac. (air) are recommended for best results. When deficiency symptoms are severe, a repeat application of 1-2 qt/ac. may be needed for two or more weeks following the initial application.

COMPATIBILITY

PROVANT PULSE has been shown to be compatible with most pesticides and liquid fertilizers. However, a jar test may be needed to guarantee compatibility due to differences in the quality of specific water sources or fertilizers.

ACTIVE INGREDIENTS

Total Nitrogen (N)	6%
Sulfur (S)	3%
Boron (B)	0.25%
Iron (Fe)	1%
Manganese (Mn)	3%
Zinc (Zn)	2%

Derived from: aqua ammonia, boric acid, iron sulfate, manganese sulfate, and zinc chelate. Chelated with EDTA and citric acid.

FEATURES AND BENEFITS

- Foliar applied.
- All purpose micronutrient package.
- Provides needed micronutrients with a non-crop bias.

PACKAGE SIZE

2 x 2.5 gallon
250 gallon
